1 Motifsuche

1.1 ChIP-chip und ChIP-seq

1.2 crosslinking

1.3 sonication

1.4 Selektion mittels Antikörpern

1.4.1 Eigenschaften von Antikörpern

1.5 reverse crosslinking

1.6 Chiphybridisierung

1.7 Sequencing

2 Peak Calling

3 CLIP-Seq

3.1 ICLIP

4 PAR-CLIP

5 Protein-Protein-Interaktion

6 Tandem Affinity Purification (TAP)

6.1 Local clique merging algorithm (LCMA)

6.2 Clique Finding Algorithm (CFA)

7 RNA structure probing

7.1 chemical probing
